Dear Hiring Manager,

I have never been so excited to write a cover letter. I am excited to just even be applying to rockstar games. I am currently a Senior at Union College, Schenectady currently pursuing an interdepartmental Bachelor's degree in Computer Science and Studio Arts.

My first rockstar game was Vice City on my PSP, my mom bought it for me at toys r us not really knowing what the game rating meant and promptly took it away when she saw me playing one day. The growth from Vice City to GTA 5 is amazing to me and I know that Rockstar has an amazing development team because making open world games such GTA 5 and more recently Red Dead Redemption 2 requires a lot of skill, and your games have always been critically acclaimed. Me and my friends have spent a lot of time bonding on your online servers and it would be an honor to provide a platform for future generations and other players to bond or just mess around in. Rockstar has its bugs just like any other company, I myself was impatient with rockstar with the delayed release of GTA 5 online. I would love to be part of the solution to these problems and I think I would love everyday working at Rockstar.

I am confident that my experiences, skills and a strong interest in computer science have prepared me to be a strong intern for your company. I look forward to discussing my qualifications and potential role in this role with you. Thank you for your time and consideration.

Sincerely,

Miguel Rosendo
