Dear Internship Coordinator,

I am very interested in the Cyber Security Internship with Grey Castle. I am currently a Senior at Union College, Schenectady currently pursuing an interdepartmental Bachelor's degree in Computer Science and Studio Arts.

I have been aware in some sense of cyber security since my early days on the internet when my dad would never let me buy stuff on ebay with his card due to a fear of having his card information stolen. Today I know that the chances of that are slim due to the seller not having direct access to the information, and ebay being a pretty secure website. However recent data breaches into databases of a lot of companies have opened my eyes about the lack of attention many of these companies pay towards this sensitive information. I have seen a lot of youtube videos about physical breaches and other ways cyber security firms try to test various company's security and I am intrigued. I would love to be defend hospitals and other essential services against breaches. What I bring to the table is a willingness to learn and my computer science fundamentals.

I am confident that my experiences, skills and a strong interest in computer science have prepared me to be a strong intern for your company. I look forward to discussing my qualifications and potential role in this role with you. Thank you for your time and consideration.

Sincerely,

Miguel Rosendo
